

# POLYTRON™

## ULTRA PERFORMANCE

Today's most advanced lubricants

Production facilities, including factories and machine shops, depend majorly on reliability of equipments. From large presses to small drill bits, maintaining their good condition is a difficult challenge. *POLYTRON Lubricants* can increase the reliability, eliminate equipment and tool wear, and give you a peace of mind. Not to mention, *POLYTRON* can protect your equipments in case of sudden oil loss and from corrosion. *POLYTRON* will help you maximize the profit, regardless of facility size.

### POLYTRON METAL TREATMENT CONCENTRATE (MTC)

*POLYTRON Metal Treatment Concentrate (MTC)* is the best in the industry. Attracted to metal surfaces, MTC transforms the original metal to a highly durable polished-like micro-layer of metal that drastically resist wear, extreme pressure, temperature, and contaminants. Only by adding 10% by volume to your current main lubricant, you will gain great benefits and protection, that saves you \$1000's.

**SIZES:**  
16 oz Bottle  
1 Gal Jug  
4 Gal Pail  
55 Gal Drum

**APPLICATION:**

- ✓Pumps, Generators, Air Compressors
- ✓Gears, Chains, Slides, Cams
- ✓Machining Equipment & Tools

**EXPECTED RESULTS:**

- ✓Eliminates wear of equipment up to 99%, lowers operating temp., & noise
- ✓Keeps the parts clean and extends maintenance intervals up to 4-7 times
- ✓Protects equipment across wider range of temperatures and conditions
- ✓Provides temporary protection to equipment in the event of oil loss
- ✓Contributes to reduction maintenance costs up to 60%

### POLYTRON PENETRATING LUBRICANT (PL)

*POLYTRON PL* contains *POLYTRON MTC* and is scientifically blended to be the most effective whenever rust, corrosion, or drag is a factor. *POLYTRON PL* not only penetrates through extreme rust and corrosion, but also treats the metal surface to reduce friction and eliminate wear. Use of this product provides for long lasting, smooth operation of any metal mechanism. Lasts up to 20 times longer than WD-40.

**SIZES:**  
14 oz Tube  
35 lb Pail  
420 lb Drum

**APPLICATION:**

- ✓Electric & Air Tools, Chains
- ✓Mill, Lathe, Drills, Productions
- ✓Slides, guides, ways, screw, cams
- ✓Battery Electrical Poles
- ✓Moving Parts in Motors

**EXPECTED RESULTS:**

- ✓Fast penetration: breaks down rust and corrosion, speeds up machining
- ✓Very effective at machining all metals resulting in following benefits: 3 to 4 times lower tool wear, much smoother and cleaner surface finish, prevents welding (metal sticking to cutting tools)
- ✓Eliminates wear, lubricates and protects as it penetrates
- ✓Reduces power consumption, temp., and noise when used as lubricant
- ✓Very effective moisture repellant; Cleans and retards electrical corrosion

### POLYTRON EP-2 LITHIUM COMPLEX GREASE (EP2)

*POLYTRON EP-2 Lithium Complex Grease* is a superior quality, multi purpose, wide temperature-range lubricant. It is made with lithium complex soap, quality base oils and *POLYTRON*'s scientifically engineered anti-wear friction reducing formula with other additives to contribute to its outstanding qualities of water resistance and anti rust/corrosion protection. It may also be used in electric motors of NEMA insulation class A and B types. *POLYTRON EP-2 Grease* does not soften excessively during high speed operation in rolling contact bearings. Excellent for industrial equipments and vehicles.

**SIZES:**  
14 oz Tube  
35 lb Pail  
420 lb Drum

**APPLICATION:**

- ✓Vehicles, Gears, Heavy Equipment
- ✓Joints, Bushings, U-Joints, Chains
- ✓Rack & Pinion Gears, Bearing
- ✓Saw Mills, Industrial Presses

**EXPECTED RESULTS:**

- ✓Eliminates wear by up to 95% and reduce maintenance cost up to 60%
- ✓Protects equipments during temporary loss of grease
- ✓Operates in severe condition and temperature
- ✓Repels water and protection against from corrosion
